Touchstone Communities Acquires Skilled-Nursing Community in Houston

[Houston, Texas and San Antonio, Texas] –Touchstone Communities®, a growing provider of rehabilitation and skilled-nursing care in Texas, is pleased to announce West Oaks Nursing & Rehabilitation is joining the team. West Oaks was purchased out of bankruptcy, and with this acquisition Touchstone now manages 21 skilled-nursing communities in the state of Texas.

“We are very excited to grow as a company,” commented Laura Miller, Chief Operating Officer of Touchstone Communities, “We’ve been operating in Texas for 25 years and are so pleased to welcome West Oaks into the Touchstone family. West Oaks represents our fourth skilled-nursing community in the Houston region. We like the Houston market and are excited about serving the residents of this community.”

Leading operations at this community is Lee Rivaz, Vice President of Operations. “We are really excited about this opportunity to expand our presence in the Houston market, and we are honored to care for the additional 100 residents at this community,” Rivaz stated. “Given the uncertainty that has surrounded this community and the bankruptcy, we are proud to offer residents and their family members, along with the roughly 100 team members we have hired, a high-quality and stable environment. We also intend to invest significant capital over the next six months to update and remodel the community.”

Touchstone Communities’ acquisition will not only help those in need of its services but also those who are seeking career opportunities.

West Oaks Nursing & Rehabilitation is a 136-bed community located at 3625 Green Crest, Houston, Texas 77082. The community offers skilled nursing/short-term care, post-hospital care, long-term care, rehabilitation, support services, respite care, and memory care. The community is considered a home away from home, and puts resident comfort first. Outdoor activity areas with gardens and courtyards, private family areas, large private and semi-private rooms, Wi-Fi Internet throughout the community, and a modern therapy department with advanced technical gyms and equipment contribute to the building’s many features.
